Dear Sir/Madam,

I hope this message finds you well. I am writing to express my interest in any potential internship opportunities within your company. As a Computer Science undergraduate at the Informatics Institute of Technology (IIT), affiliated with the University of Westminster, I am eager to apply my academic knowledge and hands-on development experience in a dynamic and innovative environment.

Through my academic studies and practical projects, I have developed a strong foundation in Object-Oriented Programming (OOP), Algorithms, and Data Structures, which I apply in real-world problem-solving. I have experience working with Java, React Native, Node.js, Express.js, React, MongoDB, SQL, and HTML/CSS, and I am well-versed in Git for version control and collaborative development. I also have solid server-side development knowledge, including building RESTful APIs, handling authentication, managing databases, and designing backend logic for scalable applications.

What sets me apart is my ability to adapt quickly to new technologies, tools, and tasks. Whether it's working on the frontend, backend, or integrating both, I enjoy learning and contributing across the full stack.

Beyond technical skills, my involvement in the IEEE Computer Society at my university has helped me grow as a communicator, organizer, and team player. I've led and participated in various events that required strong collaboration, problem-solving, and project management abilities.

If there are any current or future opportunities that would align with my skills and background, I would greatly appreciate the chance to discuss how I can contribute to your company. Please find my CV attached for your consideration.

Thank you for your time and consideration.

Best regards,

Thushan Madarasinghe
